

Baku Aquatic Center

Baku, Azerbaijan

A water palace for the first European games

The water palace built for the celebration of the first European Games in Baku has capacity for 6,000 spectators.

Of elliptical volume to adapt its shape to the uses of the facility and with large glazed surfaces, the Baku Aquatics Palace is already one of the most iconic buildings in the city on the shore of the Caspian Sea.

Technical details:

Name: Baku Aquatics Palace

Location: Baku, Azerbaijan

Year of development: 2015

Venue: Stadiums & Arenas

Architecture: Pujol Arquitectura

Property: Ministry of Youth and Sports, Azerbaijan

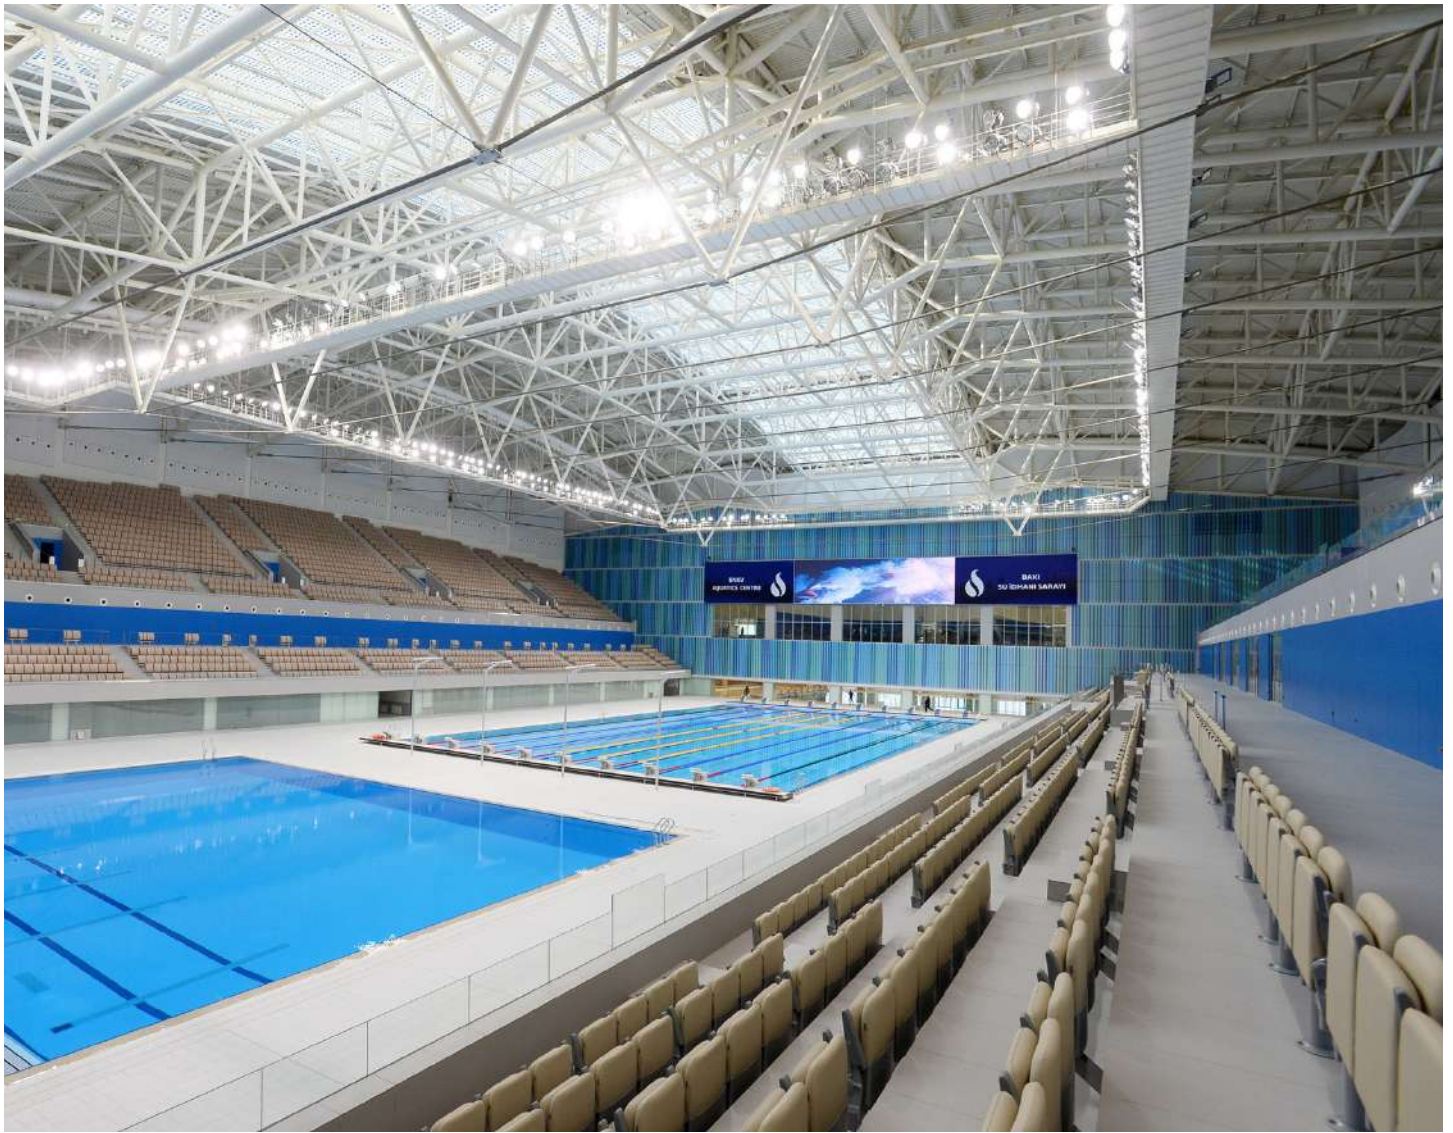

Total surface: 55,000m²

Capacity: 6,000 spectators

Product: Arena 302, Minispace 5037 and Megaseat

The architecture firm specialized in sport activities, especially aquatic ones, Pujol Arquitectura, was the responsible for designing the facilities in which there are two 50-metre swimming pools, one for diving, restoration areas, fitness, spa and training areas. The center has three seating areas. The stands, the VIP area and the presidential area. A different kind of chair was chosen for each of them.

Product supplied

The stands are equipped with the model Arena, a unique sport seat by Figueras featuring a curvy design and automatic folding. Only 21 cm deep when folded, it combines comfort with space optimization and an attractive design.

For the VIP areas, another compact model by Figueras was selected, the MiniSpace, upholstered in beige imitation leather and only 15 cm deep. The presidential area was equipped with the large and comfortable model Megaseat upholstered in leather. All the chairs conform to the demanding fire safety measures, an essential requirement in an indoor facility of these characteristics.
